

Morning Sound Farm Accessibility Information

We want everyone to be able to enjoy a visit to the farm! Here is a description of what people usually want to know- if any information is missing that would be helpful to you, please let us know.

Wheelchair accessible washroom with adult sized change table

The dimensions of this room are basically 5' by 6'. (diagram and pictures below- on page 2) The change table is just over 5' long and 2' deep. It is 34" high off the floor.

Access to water

We have access to clean drinking water outside, as well as a sink for handwashing. If hot water is needed, you are welcome to use our house.

Wheelchairs on the grounds

The grounds are all grassy and gravel, and wheelchairs and strollers fair quite well everywhere. When there are animals upstairs, our children always bring animals down to people unable to climb stairs.

The hayride

The hayride is an open platform with no railings, and the loading area is level with the platform of the wagon. Wheelchairs can often roll right onto the platform and be held in place for the ride. Others will leave the wheelchair on the loading area and sit directly on the bales.
